MAHMOUD AMER FAWZY

Aswan, Egypt | +20 111 283 8299 | mahmoud.amer0a@gmail.com | linkedin.com/in/mahmoud-amer-23194a253

PROFILE

Electronics & Communications Engineering graduate (Aswan University, 2024) with a broad, hands-on technical foundation spanning networking, IT systems support, embedded systems, and programming. Comfortable moving across domains, quick to pick up new tools and environments, and looking for an entry-level engineering, IT, or technical support role where that versatility adds value, with an eye toward growing into software development over time.

EDUCATION

Bachelor of Engineering — Electronics & Communications (ECE) (Aswan University, Aswan, Egypt *2019 – 2024)*

CORE SKILLS

- Embedded Systems: Embedded C, microcontrollers, AVR interfacing, RTOS concepts, sensor & hardware interfacing
- IT Systems & Support: Windows Server & Active Directory (AD DS, GPO, OUs), Windows installation/configuration, hardware & software troubleshooting, virtualization (Hyper-V), IT ticketing (ServiceNow), Microsoft 365 administration
- Programming & Data: C, C++, Python, scripting and automation basics, data analysis with Pandas/NumPy, data visualization with Matplotlib
- Web & Version Control: HTML, CSS, JavaScript, SQL, Git & GitHub
- Networking: TCP/IP, OSI Model, IPv4 & subnetting, DHCP, DNS, VLANs, NAT/PAT, ACLs, WLAN, routing & switching, Cisco Packet Tracer
- Other: strong troubleshooting and problem-solving instincts, fast self-directed learner, comfortable working independently or in a team

CERTIFICATIONS & TRAINING

- CCNA coursework (Coursera) — TCP/IP, subnetting, routing & switching, VLANs, DHCP/DNS, NAT/PAT, ACLs, WLAN, network troubleshooting
- CompTIA A+ (Coursera) — PC hardware, Windows administration, troubleshooting, networking fundamentals, mobile devices, security, virtualization, cloud
- Windows Server Administration — AD DS, OUs, GPO, DNS, DHCP, NTFS & shared permissions, Remote Desktop Services, Hyper-V, WSUS
- Microsoft 365 (MS-900) — Microsoft Entra ID, Intune, Exchange Online, Teams, SharePoint, OneDrive, Defender, licensing & compliance
- Data Analysis (NTI) — Python, Pandas, NumPy, Excel data cleaning, Matplotlib visualization
- Embedded Systems Diploma (ITI) — C programming, microcontrollers, AVR, RTOS, hardware/software interfacing

PROJECTS

Smart Robotic Wheelchair — Graduation Project (Team-based)

- Contributed to a multi-mode control system; interfaced healthcare sensors and collected real-time data via microcontroller; implemented real-time-database data transmission to a mobile app for mode selection and speed control (IoT-based communication).

Smart Home Simulation System

- Built a keypad password-authentication door control system with LCD, automatic lighting based on light sensors, and automatic AC control based on temperature readings.

Automatic Irrigation System

- Designed a soil-moisture-based irrigation system that automatically activates/deactivates a water valve, simulating real-time environmental monitoring.

Small Office Network Design & Simulation

- Designed a small-office network in Cisco Packet Tracer with VLAN segmentation, trunk ports, inter-VLAN routing, server deployment, IP addressing, and end-to-end connectivity testing.

IT & Networking Labs

- Completed CCNA-based labs and simulations covering IP addressing, subnetting, and routing/switching fundamentals.

LANGUAGES

Arabic (Native) | English (Professional working proficiency)
